

INTRODUCTION TO NETWORKS

1. Draw a simple diagram (hand-drawn or digital) showing how your phone connects to Instagram, including your device, WiFi router, ISP, and Instagram server. Label each part and the connections.

2.List 5 devices you use or see daily that are part of a network (for example: smartphone, smart TV, WiFi router, laptop, smartwatch). For each, write what type of network it connects to (LAN, WAN, PAN, etc.).

Device	Type of Network	Example Use
Smartphone	WAN (Mobile Data) / LAN (Wi-Fi)	Browsing the internet and using social media.
Laptop	LAN (Wi-Fi or Ethernet)	Studying, browsing, and online meetings.
Wi-Fi Router	LAN & WAN	Connects home devices to the internet.
Smart TV	LAN (Wi-Fi)	Streaming YouTube, Netflix, and other online content.
Smartwatch	PAN (Bluetooth)	Connects to a smartphone to receive calls and notifications.

3.Explain the difference between the Internet and an intranet using an example from your college or a public WiFi you have used.

Internet	Intranet
The Internet is a global network that anyone can access.	An Intranet is a private network used only within an organization.
It is used for websites, email, YouTube, and social media.	It is used to share files, notices, and information within a college or company.
Anyone with an internet connection can use it.	Only authorized users can access it.

4. Pick any one app you use (like WhatsApp, Zomato, or Flipkart) and describe, in 4-5 lines, how data travels from your device to their server and back when you perform a search inside the app.
Hint: Mention the devices and networks involved, and what happens when you hit 'search'.

Example: WhatsApp

When I search for a contact in WhatsApp, my phone sends the search request through Wi-Fi or mobile data to my Wi-Fi router (if using Wi-Fi), then to my Internet Service Provider (ISP). The request travels over the Internet to the WhatsApp server. The server finds the matching contact or chat and sends the result back through the Internet, ISP, and router to my phone. The matching results are then displayed on the screen.
